Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1, 3-5, 7-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Qu et al. (6435277 B1).

Qu teaches a composition for improving the permeability of a subterranean formation which comprises a cationic surfactant and a nonionic surfactant within the scope of the present invention (see column 8, lines 31-54, column 7, lines 56-65, the cationic and nonionic surfactants of columns 21 and 22, and example 25 which teaches a specific example within the scope of the present invention).

2. Claims 1, 3-5, 7-12, 14, 15, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Frazier (5246072).

Frazier teaches a method of treating a subterranean formation using a composition which comprises a cationic surfactant, and a nonionic surfactant within the scope of the present invention (see column 3, line 4 – column 4, line 33, and examples 2 and 3).

3. Applicants arguments have been considered but are not deemed fully persuasive. Applicants amendment has distinguished over Urfer, since such does not teach an injection well. Applicants have argued that the current invention relates to the water injectivity of an injection involving a waterflood process. Applicants claims are not directed to either of water injectivity or a waterflood process, and are thus not seen as having any distinguishing features from the prior art of Qu (column 1, lines 26-35) or Frazier (column 2, lines 15-41), both of which teach restoring permeability in a process involving an injection well. The term “up to” of claim 8 is seen as inclusive of zero. The present claims are not seen to differ from the prior art.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1712

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
